EXPRESSION OF INTEREST (EOI)

**DEVELOPMENT/IMPLEMENTATION OF AN E-PROCUREMENT SYSTEM FOR HEALTH RESEARCH
OPERATIONS KENYA LIMITED
EOI NO. EOI/01/2026**

Health Research Operations Kenya Limited (HROKL) is a not-for-profit Company Limited by Guarantee and registered under the Companies Act 2015 – Registration no. CPR/2014/155301. HROKL is the operating vehicle for the KEMRI Wellcome Trust Research Programme (KWTRP). KWTRP is well known for its work tackling malaria and other infectious diseases among children and has a broad scope in medical research, carrying out basic laboratory-based research, clinical and community-based studies, health systems and health policy research. The twin aims of the programme are to conduct research to the highest international scientific and ethical standards on major causes of morbidity and mortality in Africa, and to build a strong and sustainable national and regional research capacity.

HROKL invites eligible and Qualified firms to Submit Expression of Interest for developing an E-procurement system that enables automation of some of the manual procurement processes not currently included in the ERP system. This system will facilitate the end-to-end procurement process, ensuring transparency, efficiency, and compliance with best practices in supply chain management. The system will facilitate better supplier and contract management as well as ease the process of bid evaluation. The system should either be on premises or on cloud.

The detailed Expression of Interest [EOI] and application procedure details are on our website: www.kemri-wellcome.org in the Procurement section found in the header section of the website.
